TDI site back online!

2014-04-07 11:56:31 by XenoMorpH

TDI-HQ.COM is back online!! Finally!!
At the begin of March TDI was moved to a new server at a different host. Backups were made
from the databse, but when seting up the site, it seemed that the backup SQL was corrupt.
While running the lastest php version, new errors popped up also, eregi() function in php was
deprecated, so I had to rewrite alot of files to preg_match().
I hope the site works again, of not, then just let me know in the forums.....
