

Yet again, back online!!

2024-11-10 12:38:22 by XenoMorpH

As a terst I have managed to upgrade the old phpnuke site to a RavenNuke 2.52 core one.

I know phpnuke is not used much anymore, but this site brings back so many memories, I could not resist fixing the blocks, modules and homebrew scripts I made to fit RavenNuke.

I have fixed vWar, my cheaters list module, Neos_Chronos Babstats server module, my vWar block script (accept the bloody calendar)...

All is running on php 7.4, maybe I will try to upgrade to 8.x later on. Same goes for the phpBB version which needs to be updated also.
